| Role

- 1- Dena Alharbi | Features 1 & 7 & Distribution of tasks
- 2- Farah Hammad | Features 8 & 5 & Progress Tracking
- 3- Dana Alyahya | Features 2 & 6 & Time management
- 4- Atheer Almomtan | Features 3 & 4 & 9

Project Idea Description:

Our platform, SpaceSaver, transforms unused areas like garages, basements, and spare rooms into income-generating opportunities for everyday people. By connecting individuals with extra storage capacity to those seeking affordable and flexible storage solutions, we empower homeowners and renters to monetize their unused areas. This not only helps them earn extra income but also creates a practical solution for those in need of storage, making it a mutually beneficial arrangement. In Saudi Arabia many residents face challenges such as limited housing space and the need for temporary storage during relocations or renovations. Traditional storage facilities can be expensive and often lack accessibility. By enabling individuals to monetize their unused spaces, we not only alleviate the storage burden but also promote a culture of sharing and sustainability, aligning with the country's vision for economic diversification and community engagement.

Features:

- 1- Listings of available spaces to rent
- 2- Smart searching based on location, size, and time
- 3- Secure booking system with payment methods
- 4- What the space offers feature where renters can display the advantages of the space, for example AC or advanced security locks
- 5- Calendar integration feature so renters get reminders of client bookings and seekers get reminders to move their packages or whatever they are storing into the reserved space
- 6- Direct Messages for easy communication between renter and customer
- 7- Rating and reviews for both providers and seekers
- 8- A logistics company connection feature that will allow users to move large items into the storage space for an extra fee
- 9- AI Help bot for the user to ask questions about the process and best options

Target Audience: It's a client-to-client website so there are two targets. Firstly, homeowners and renters with extra space who want an extra source of income. And secondly, anyone who needs space temporarily such as students, travelers, and families in transition.
