Dana Alyahya 202279460

Farah Hammad 202257640

Introduction

Our platform, حُجَّرَة, is designed to transform unused areas such as garages, basements, and spare rooms into valuable, income-generating opportunities for everyday people. The idea is simple yet powerful: by connecting individuals who have extra storage capacity with those actively seeking affordable and flexible storage solutions, we provide a service that is both practical and mutually beneficial. Homeowners and renters are empowered to monetize spaces that would otherwise remain idle, while those in need of storage gain convenient and budget-friendly options tailored to their circumstances.

In Saudi Arabia, many residents face daily challenges related to limited housing space, frequent relocations, and the need for temporary storage during renovations or family transitions. Traditional storage facilities often come with high costs, rigid contracts, and limited accessibility, which makes them less appealing to the average person. By enabling individuals to share their unused spaces, حُجَّرَة not only alleviates the storage burden but also contributes to fostering a culture of collaboration, sustainability, and resourcefulness. This vision aligns strongly with the Kingdom's broader goals of economic diversification, innovation, and enhanced community engagement.

Phase I: Requirements Elicitation

Stakeholder Identification

Admin: Oversees platform operations, manages user accounts, listings, and moving company partnerships, and resolves disputes when needed.

Renter: Can create an account, browse available rooms, book accommodations, request moving services, and communicate with the provider.

Provider: Can list available rooms for rent, manage bookings and availability, interact with renters, and receive payments through the platform.

Requirements modeling:

a-Functional Requirements

1- Admin

1. Search User Accounts

- a) Admin logs into the system using valid credentials.
- b) Admin navigates to the "User Management" section.
- c) A search bar for searching for a username
- d) System displays the user and actions available

2. Manage Listings

- a) Admin navigates to the "User Management" section.
- b) A search bar for searching for a username
- c) Admin clicks on Manage Listings
- d) Page of all the accounts listings are available
- e) Admin Modifies or removes

3. Deactivate User Accounts

- a) Admin accesses the "user management" section.
- b) A list of user names are available.
- c) Admin selects a user name and chooses to deactivate.
- d) The system confirms the action and updates the database.
- e) System reflects changes in renter options.

4. Monitor Moving Company Partnerships

- a) Admin opens the "Moving Company Management" section.
- b) A list of third-party companies is displayed.
- c) Admin adds, edits, or removes a partner and clicks "Save."

- d) The system updates the database and reflects changes in renter options.

5. Access Admin Dashboard

- a) Admin logs into the system using valid credentials.
- b) The system redirects to the "Profile" page.
- c) Clicks on the Admin Dashboard action
- d) The dashboard displays key metrics such as total users, active listings, pending approvals, and recent activity logs.

6. Approve or Reject Listings

- a) Admin navigates to the "Listings Review" section.
- b) A list of pending room listings is displayed.
- c) Admin selects a listing and chooses to approve, reject, or request edits.
- d) The system updates the listing status and notifies the provider.
- e) Admin receives a confirmation message.

7. Review Compliance Reports

- a) Admin opens the "Compliance Window."
- b) A list of flagged users or spaces is displayed.
- c) Admin reviews report details.
- d) Admin contacts involved parties if needed.
- e) Admin logs decisions and updates through email

8. Send Announcements to Providers

- a) Admin logs into the system using valid credentials.
- b) Admin navigates to the "Notifications Center."
- c) Admin composes a message
- d) Admin clicks "Send Announcement."
- e) The system validates the message and dispatches it only to users with the Provider role.
- f) Providers receive the announcement in their dashboard and notification panel.
- g) Admin receives a confirmation that the message was successfully delivered.

2- Renter

1. User Registration

- a) Renter navigates to the "Sign Up" page.
- b) Renter enters personal details (name, email, password).
- c) The system validates inputs (e.g., unique email, password strength).
- d) If valid, the system stores data and sends an activation email.
- e) Renter clicks the activation link and receives a success message.

2. User Login

- a) Renter navigates to the "Login" page.
- b) Renter enters registered email and password.
- c) The system validates credentials against stored user data.
- d) If credentials are correct, the system grants access and redirects the renter to their dashboard.
- e) If credentials are incorrect, the system displays an error message prompting retry or password recovery.
- f) Renter can optionally select "Remember Me" to stay logged in on the device.
- g) Successful login triggers a welcome message and displays personalized content.

2. Browse and Search Listings

- a) Renter logs in and lands on the homepage.
- b) The system displays available room listings.
- c) Renter uses filters (location, price, amenities).
- d) The system shows matching results.
- e) Renter clicks a listing to view details.

3. Book a Room

- a) Renter selects a room and clicks "Book Now."
- b) Renter chooses dates and confirms booking.
- c) The system checks availability and calculates total cost.
- d) Renter proceeds to payment.
- e) The system processes payment and confirms booking.
- f) Renter receives booking details and contact info.

4. Request Moving Services

- a) During booking, the renter selects "Add Moving Service".
- b) The system displays available partners and quotes.
- c) The renter selects a company and confirms.
- d) The system sends the request to the moving company.
- e) Renter receives confirmation and tracking info.

5. View Booking History

- a) Renter navigates to "My Bookings."
- b) The system displays past and upcoming reservations.
- c) The renter can cancel or contact the host if needed.

6. Rate and Review Provider

- a) After checkout, the renter receives a prompt to rate the provider.
- b) Renter selects a star rating and writes feedback.
- c) The system stores the review and updates the host profile.

7. Communicate with Provider

- a) Renter opens the WhatsApp link icon.
- b) The system directs renter to WhatsApp.
- c) The renter sends a message.

8. Add space to wishlist

- a) Renter Navigates to a listing
- b) Presses the option to add to his/her wishlist
- c) Renter can access Wishlist from the dedicated page

3-Provider

1. Create Listings

- a) Provider logs in and clicks "Add Listing."
- b) Provider enters room details (photos, description, price, location).
- c) The system validates inputs and saves the listing as a draft.
- d) Provider submits for approval.
- e) Admin reviews and publishes the listing.
- f) Provider receives confirmation.

2. Set Availability Calendar

- a) Provider opens the "Calendar" view.

- b) Provider selects available dates and sets booking rules.
- c) The system updates listing availability in real time.

3. Manage Booking Requests

- a) Provider receives a notification of a new booking.
- b) Provider opens the "Requests" tab to view renter details.
- c) Provider accepts or declines the request.
- d) The system updates the booking status and notifies the renter.

4. Receive Payments

- a) Provider navigates to the "Transactions" section.
- b) The system displays transaction history and payout status.
- c) Provider links a bank account or payment method.
- d) The system processes payouts and sends confirmation.

5. Rate and Review Renters

- a) After checkout, the provider receives a prompt to rate the renter.
- b) Provider selects a rating and writes feedback.
- c) The system stores the review and updates the renter's profile.

6. Communicate with Renters

- a) Provider opens the WhatsApp link icon.
- b) The system directs provider to WhatsApp.
- c) The provider sends a message

7. Manage Listings

- a) Provider logs into the system using valid credentials.
- b) The system redirects to the provider dashboard.
- c) Provider clicks the "My Listings" tab to view all active
- d) A list of room listings is displayed
- e) Provider selects a listing and chooses to edit or remove it.
- f) Provider sees the updated list and receives a success notification.

8. View Notifications and Announcements

- a) Provider logs into the system using valid credentials.
- b) The system redirects to the provider dashboard
- c) The provider Navigates to the notifications section
- d) The system displays a list of platform-wide announcements (e.g., policy updates, feature releases) and personalized alerts (e.g., booking status, payout confirmations).

b- Non-Functional Requirements

USABILITY REQUIREMENTS		
ID	REQUIREMENT DESCRIPTION	PRIORITY
NFR1	The system shall provide a clean and easy to navigate interface with clear menu labels for Admins, Renters, and Providers.	HIGH
NFR2	The system shall provide consistent layouts, colors, and button styles across all pages to enhance usability.	MEDIUM
NFR3	The system shall provide clear error and success messages for user actions such as login, booking, and listing submission.	HIGH

SECURITY REQUIREMENTS		
ID	REQUIREMENT DESCRIPTION	PRIORITY
NFR4	The system shall prevent users from accessing pages that do not match their role.	HIGH
NFR5	The system shall display error messages without revealing sensitive system or database information.	MEDIUM

COMPATIBILITY REQUIREMENTS		
ID	REQUIREMENT DESCRIPTION	PRIORITY
NFR6	The system shall function correctly on modern web browsers including Chrome, Safari, and Edge.	HIGH
NFR7	The system shall be responsive and display properly on different screen sizes such as laptops, tablets, and mobile devices.	HIGH

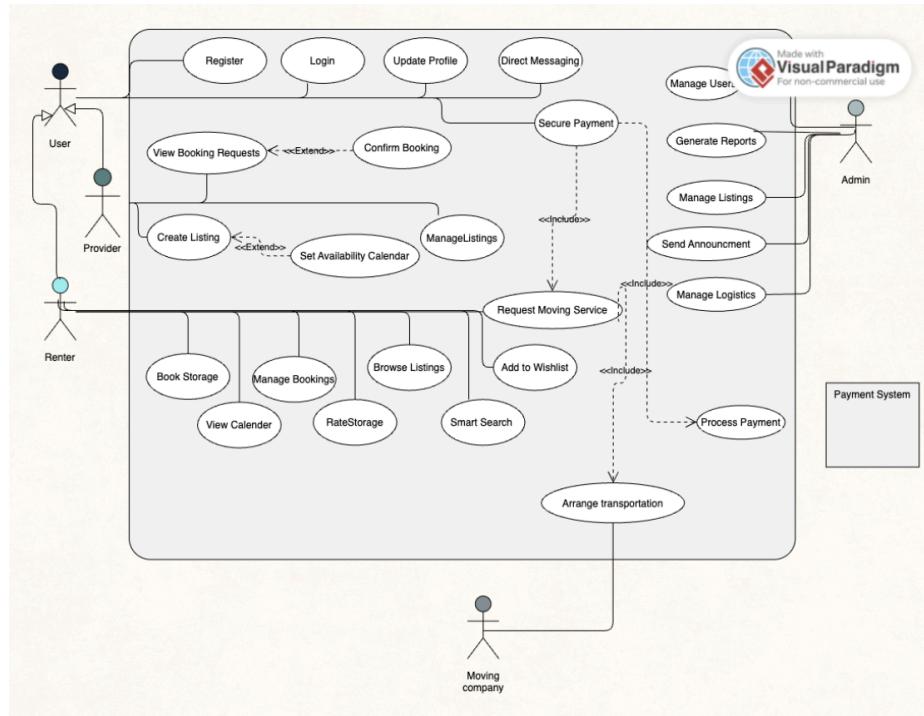

INTEGRATION REQUIREMENTS		
ID	REQUIREMENT DESCRIPTION	PRIORITY
NFR8	The system shall provide a WhatsApp link integration for communication between renters and providers.	HIGH
NFR9	The system should support email notifications using a simple mail service.	MEDIUM
NFR10	The system shall integrate a payment gateway (e.g., PayPal, Apple Pay) for processing transactions.	MEDIUM

PERFORMANCE REQUIREMENTS		
ID	REQUIREMENT DESCRIPTION	PRIORITY
NFR11	The system shall load the main dashboard page within 3 seconds on a standard internet connection.	HIGH
NFR12	The system shall handle at least 20 simultaneous users without noticeable performance degradation.	MEDIUM
NFR13	The system shall ensure that room searches return results within 2 seconds for normal query sizes.	MEDIUM

RELIABILITY REQUIREMENTS		
ID	REQUIREMENT DESCRIPTION	PRIORITY
NFR14	The system shall provide confirmation prompts for critical actions such as deleting a listing or user account.	LOW
NFR15	The system shall ensure that all user data is stored consistently in the database even after unexpected interruptions.	HIGH
NFR16	The system shall recover from simple server restarts without data loss.	HIGH

PORTABILITY REQUIREMENTS		
ID	REQUIREMENT DESCRIPTION	PRIORITY
NFR17	The system should run properly on both Windows and macOS operating systems.	HIGH
NFR18	The system shall be deployable on different web servers without needing major changes in the source code.	LOW

Annotated Mockups

Login		<p>Purpose: Allows existing users to log in securely.</p> <p>Header: “Login or Signup” – main title of the modal.</p> <p>Phone number input: Text field for entering phone number.</p> <p>Password input: Secure field to enter password.</p> <p>Continue button: Primary CTA button to submit credentials.</p> <p>Signup link: Text link for users without an account.</p> <p>Footer: Identical to other screens</p>
-------	---	--

signup		<p>Purpose: Registers new users with credentials.</p> <p>Header: Same as login (“Login or Signup”).</p> <p>Country selector: Same dropdown.</p> <p>Phone number input: Enter user’s phone number.</p> <p>Create Password: First password entry.</p> <p>Confirm Password: Second password entry for verification.</p> <p>Continue button: Primary CTA to register.</p> <p>Login link: Text link for users who already have accounts.</p> <p>Footer: Identical to login page footer.</p>
--------	---	---

Home Page

**Navigation Decision:**

A simple top navigation bar helps users move easily between main sections like Find a Space and Rent Your Space with a Back button to let the user go back to the search page.

Layout & Interaction Decision:

The homepage is organized into clear sections such as Search, Latest Listings, and Top Rated Properties for easy browsing.

Content Decision:

Property cards display key details like price and location, helping users compare spaces quickly.

Visual Design Decision:

Soft colors and clean spacing make the page look simple and easy to read.

User Engagement Decision:

Buttons like Become a Renter and Find a Space encourage users to take quick actions.

The Booking Page wireframe displays a property listing for a "Small Room in an Apartment" located in Dammam, SA. The listing includes the following details:

- Offered Features:** 50 m², Air Conditioner, Smart Lock, Humidity Sensor.
- Price:** ₩1 per day (Per Days: ₩1, Per Weeks: ₩5, Per Months: ₩18).
- Reviews:** ★ 5.0 (Features: 5.0, Communication: 5.0, Air-Conditioner: 5.0, Location of the Space: 5.0). Reviews from Ola Ahmad (Mar 12 2020) include: "Great Space!", "Highly recommended", "Good", and "Good".
- Logistics Companies:** Aramex (Rating: ★★★★), DHL (Rating: ★★★★), SPL (Rating: ★★★★).
- Show Location:** A map showing the property's location in Dammam, SA.
- Contact Options:** Reserve Now, Space Inquiry, Contact Host.

The footer of the page includes links for COMPANY (About Us, Legal Information, Contact Us, Blogs), HELP CENTER (Find a Space, Why Us?, FAQs, Rental Guides), and CONTACT INFO (Phone: 1234567890, Email: company@mail.com, Location: KFUPM, Dharhan, SA). The page is branded with the "حُجْرَة" logo and footer text: "© 2025 Hujra | All rights reserved" and "Your Space, Their Solution!"

Navigation Decision:

The page allows navigation through key actions. Users can click the Reserve Now button to move directly to the payment process. The Show Location section lets users view the property's exact location on the map. A Show All Reviews button helps users explore more feedback from previous renters.

Layout & Interaction Decision:

The page is divided into clear sections such as images, features, location, logistics companies, and reviews. This helps users find the information they need quickly.

Content Decision:

Main details like price, size, and location are displayed at the top for quick understanding.

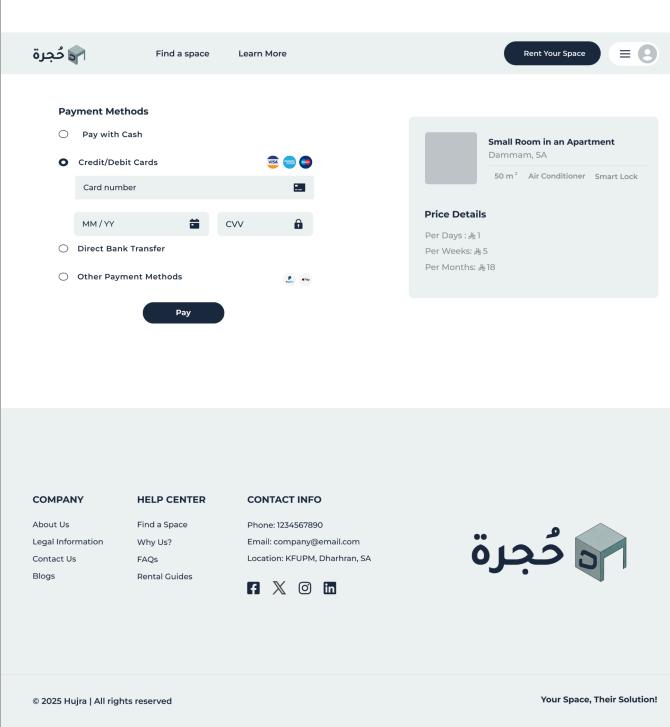

The page also includes a section showing available moving companies to help users organize their move easily.

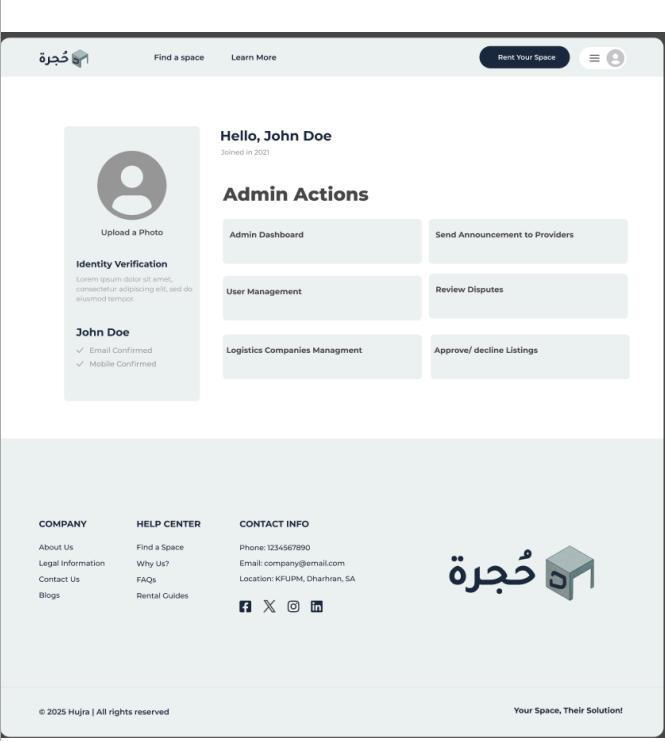

Visual Design Decision:

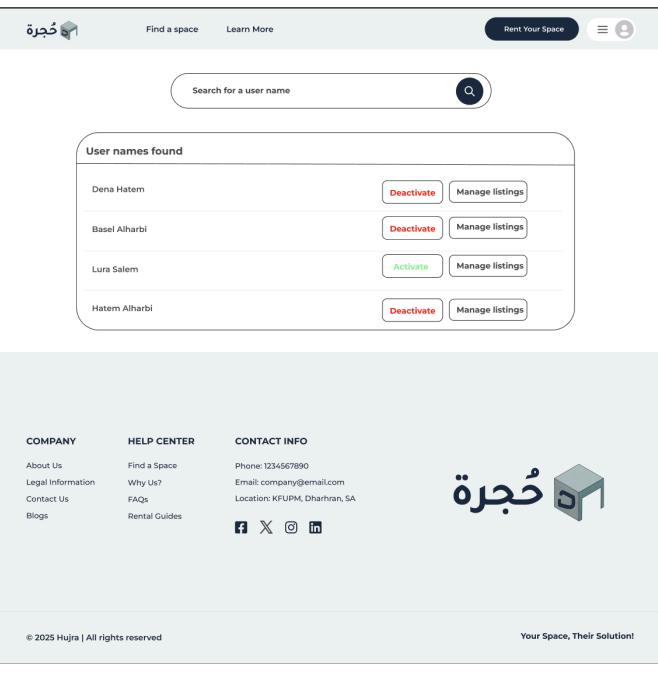

Icons, consistent spacing, and light colors make the layout clear and comfortable to read.

User Engagement Decision:

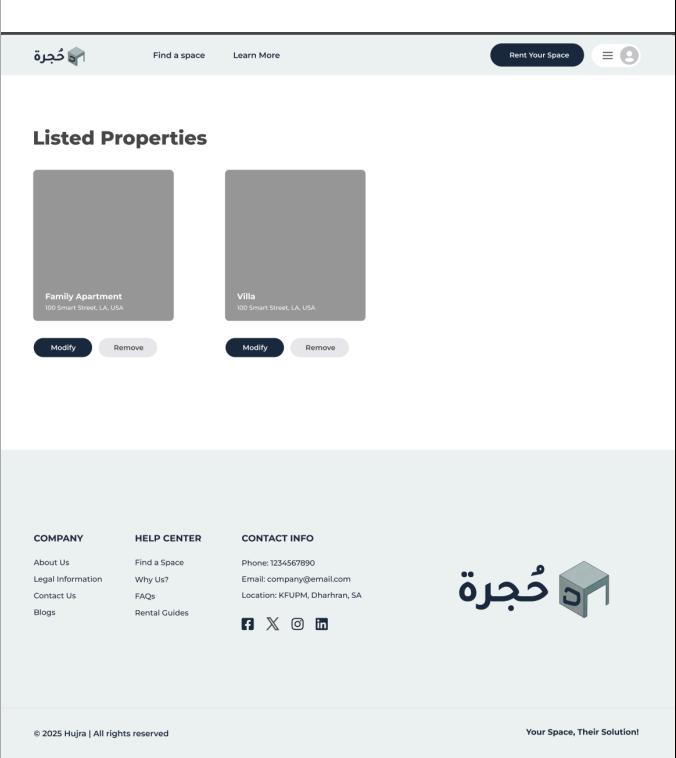

Action buttons like Reserve Now and Contact Host encourage users to interact with the platform directly from the page.

Payment Page	 <p>The screenshot shows a payment page for 'Hujra'. At the top, there are buttons for 'Find a space' and 'Learn More', and a 'Rent Your Space' button. Below this is a 'Payment Methods' section with radio buttons for 'Pay with Cash', 'Credit/Debit Cards' (which is selected), 'Direct Bank Transfer', and 'Other Payment Methods'. The 'Credit/Debit Cards' section includes fields for 'Card number', 'MM / YY', 'CVV', and a 'Pay' button. To the right, there is a summary box for a 'Small Room in an Apartment' in 'Dammam, SA' with dimensions '50 m²', 'Air Conditioner', and 'Smart Lock'. Below this is a 'Price Details' section showing 'Per Days: ₡1', 'Per Weeks: ₡5', and 'Per Months: ₡18'. At the bottom of the page, there are sections for 'COMPANY', 'HELP CENTER', and 'CONTACT INFO', along with social media links and a logo for 'Hujra'.</p>	<p>Navigation Decision: This page provides a clear flow for completing payments. Users can choose a preferred payment method. After selecting a method, clicking the Pay button takes them to the confirmation process, making navigation straightforward and intuitive.</p> <p>Layout & Interaction Decision: The page is divided into two main sections: payment methods on the left and booking summary on the right. This layout helps users review the space details (price, location, and features) while entering payment information.</p> <p>Content Decision: The page displays important booking details such as the space name and price.</p> <p>Visual Design Decision: A clean design with minimal colors focuses the user's attention on the payment form. Familiar payment icons (Visa, MasterCard, Apple Pay) build trust and make the page feel professional and reliable.</p> <p>User Engagement Decision: The Pay button is highlighted to guide users toward completing the process.</p>

Search for Spaces Page

**Navigation Decision**

A fixed top navigation bar includes “Find a Space,” “Learn More,” and “Rent Your Space,” allowing users to move between main sections while keeping their search filters visible.

Layout & Interaction Decision

The page displays filter tags and a “Filters” button above a grid of space cards, each showing an image, price, and location. Users can remove filters or scroll to view more results easily.

Content Decision

Each card presents essential details such as title, price range, location, duration, and listed user. The total number of results appears at the top to give users instant feedback on their search.

Visual Design Decision

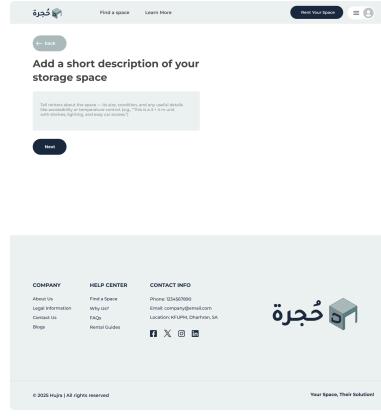

A clean white background with rounded cards and soft shadows ensures readability and consistency with the rest of the platform’s pages. Typography and spacing maintain the same visual rhythm.

User Engagement Decision

		<p>Filter options and clear search results encourage exploration, while direct access to each listing helps users quickly move toward booking or saving spaces they like.</p>

		<p>User Engagement Decision</p> <p>The short instructions and minimal layout encourage quick input while maintaining professionalism.</p>
--	--	--

Space Creation Step 3 Page	 <p>The screenshot shows a user interface for adding features to a space. At the top, there's a header with a back button, a 'Find a space' button, and a 'Learn More' button. Below the header, a sub-header says 'Add features available at your storage space'. There are two rows of icons, each with a 'Select' button. The first row includes icons for CCTV Security, AC, power outlet, and Temperature Sensor. The second row includes icons for Lockable Door, Nearby Parking, Humidity Sensor, and Other. At the bottom of the page, there's a footer with links for 'About Us', 'Help Center', 'Contact Info', and social media icons. The 'Help Center' section includes links for 'Find a Space', 'Why Use', 'FAQ', and 'User Guides'. The 'Contact Info' section includes a phone number (123-567890), email (company@gmail.com), and location (London, UK). The page is branded with the 'حجزة' logo.</p>	<p>Navigation Decision</p> <p>Navigation remains consistent with a “Back” button and main header guiding the user through the sequence.</p> <p>Layout & Interaction Decision</p> <p>Feature icons are presented as toggle cards that can be selected or deselected easily, leading to a “Next” action.</p> <p>Content Decision</p> <p>Features like CCTV, AC, Power Outlet, and Parking are displayed with icons to help users visualize their offerings.</p> <p>Visual Design Decision</p> <p>Consistent icon style and equal spacing enhance clarity and keep the interface visually light.</p> <p>User Engagement Decision</p> <p>Interactive cards provide</p>

Space Creation Step 6 Page

**Navigation Decision**

A single-page summary allows users to confirm details before final submission, with the “Back” button for revisions.

Layout & Interaction Decision

Minimal layout with centered text and a primary “Post My Space” button directs focus toward final confirmation.

Content Decision

Short instructions remind users they can edit later from the dashboard, reinforcing flexibility.

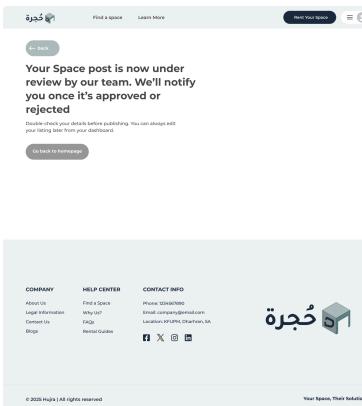

Visual Design Decision

Clean typography and white background emphasize clarity and confidence before posting.

User Engagement Decision

A clear final action button motivates users to complete the process with assurance.

Space Creation Step 7 Page

Navigation Decision

A simple layout with a “Back” button and “Go back to homepage” option ensures intuitive redirection after submission.

Layout & Interaction Decision

Centered message and single call-to-action button confirm the listing’s submission status.

Content Decision

A confirmation note informs the user that their listing is under review and they will be notified once approved.

Visual Design Decision

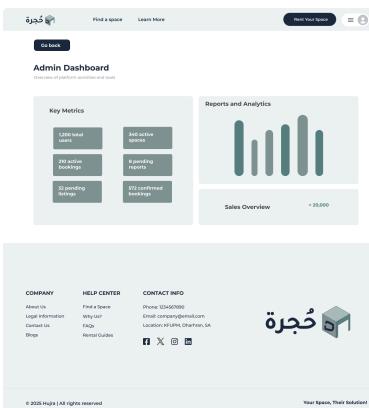

Soft typography and balanced spacing create a calm, reassuring finish to the listing flow.

User Engagement Decision

A clear success message and navigation button provide closure and maintain trust in the platform.

Billing Frequency Dropdown	 <ul style="list-style-type: none">per dayper weekper monthper year	<p>Navigation Decision</p> <p>Appears when users click the “Billing Frequency” field; easy to close or change selection.</p> <p>Layout & Interaction Decision</p> <p>Four simple options: Per Day, Per Week, Per Month, Per Year are displayed in a vertical list for quick choice.</p> <p>Content Decision</p> <p>Concise labels reflect flexible pricing periods suitable for all listing types.</p> <p>Visual Design Decision</p> <p>Rounded corners and minimal shadows match the system’s component style.</p> <p>User Engagement Decision</p> <p>A straightforward dropdown reinforces user control and speeds up data entry.</p>
----------------------------	---	--

Admin Dashboard Page

**Navigation Decision**

A consistent top navigation bar with a “Go Back” button allows the admin to return to the previous page easily while maintaining access to the site’s main sections.

Layout & Interaction Decision

The dashboard is divided into three main panels: Key Metrics, Reports and Analytics, and Sales Overview. This structure presents data clearly and makes navigation simple.

Content Decision

The Key Metrics section displays essential figures such as total users, active spaces, bookings, and pending reports, providing quick insights into overall platform performance.

Visual Design Decision

Neutral colors, clean card layouts, and simple chart visuals ensure a professional and organized appearance that matches the platform’s overall aesthetic.

User Engagement Decision

Readable statistics and visual graphs make it easy for admins to monitor activity, track progress, and stay

		informed about platform performance.
